

Delivering Performance with the S.BO EXPRESS

IAA Pre-Press Conference – 13th June, 2024

Designed to provide durable, robust and payload-optimised transport in fast-moving and harsh environments.

Dry freight semi-trailer S.BO EXPRESS

The benchmark for dry freight semi-trailers

- Body with FERROPLAST® thermal technology reliably **protects the goods** from the weather and **minimises the risk** of theft.
- **Extensive equipment** for body and chassis thanks to the modular system.
- Galvanised, rolled MODULOS chassis – easy to maintain with a **10-year warranty** against rust.
- ROTOS axle unit with **1,000,000 km or 6 years warranty**.
- Extra bright LED interior lighting in full body length on one or both sides for **more visibility inside**.
- Every trailer equipped with **TPMS** (Tyre Pressure Monitoring System) sensors and **TrailerConnect® telematics control unit** as standard.

Schmitz Cargobull roller shutter

Lightest roller shutter on the market with an XL-Code certificate

High performers for the courier, express and parcel service (CEP):

- **Designed by Schmitz Cargobull**, the roller shutter matches perfectly with the rear frames of our dry freights and swap bodies
- **Optimised handling** for efficient loading & unloading
- **Lightest on the market** with XL Certificate according to EN-12642 (Payload 27t)
- **Low maintenance** through standardisation of components and **less wear** of movable components thanks to its light construction

Our Schmitz Cargobull roller shutter

light and ergonomic

ensures robustness

supports low TCO through the total trailer-life

Heavy Duty Rear Package

Steel impact protection for distribution or lift-to-lift operation

High performers for the courier, express and parcel service (CEP):

- **More protection** of dry freight rear frame specially for distribution and hub-to-hub operations
- **More compatibility** of semi-trailer with the bumper heights of ramps and depots
- Reinforcement of rear frame to avoid **damage and reduce downtime**

More
protection

More
compatibility

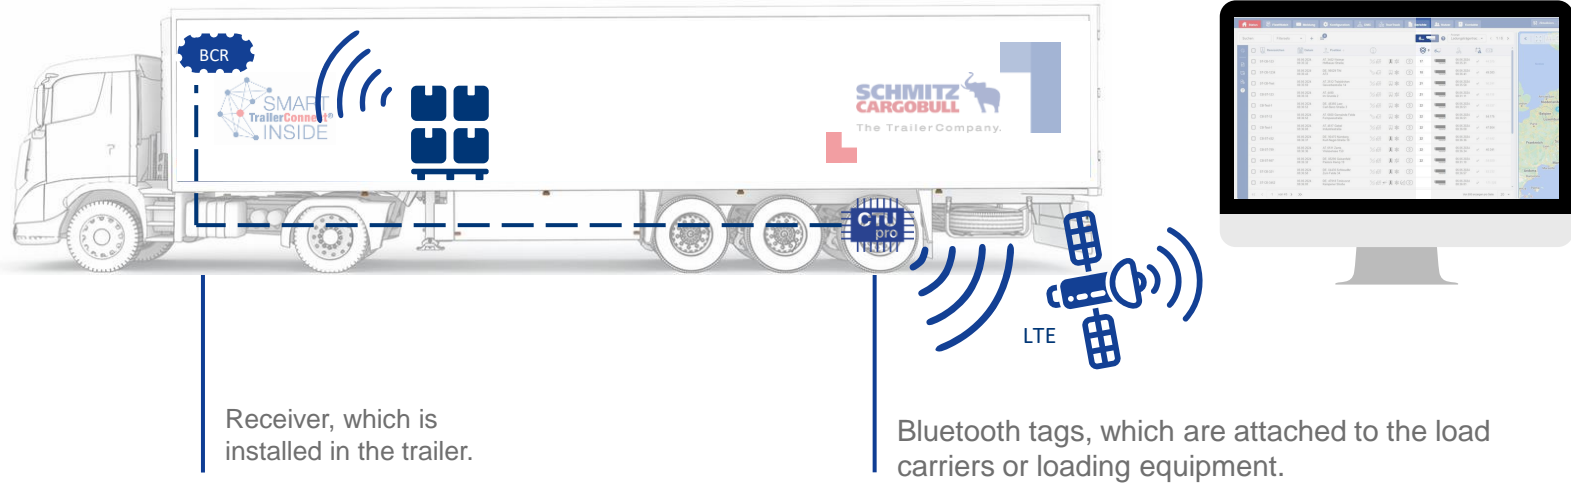

Less
downtime

Load Carrier Tracking

Keep an eye on your load and loading equipment

Active load carrier tracking for trailers enables **real-time monitoring and tracking of load and loading equipment during transport.**

Load Carrier Tracking

Keep an eye on your load and loading equipment

The benefits:

- Transparent tracking of loaded goods
- **Minimisation of loss and theft** of load carriers / loading equipment
- First OEM solution to offer this solution **directly ex-works**
- **Simple forwarding of data** directly via the TrailerConnect® Data Management Center
- **Fully integrated solution in the TrailerConnect® eco system**, including alarm messages if loaded goods and the attached tags are left behind
