

EXPRESS delivery: the robust S.KI SOLID tipper semi-trailer

# The quick-to-install solution for every construction site

The S.KI SOLID is the universal tipper trailer for construction materials. Thanks to its high wear resistance and wide range of configuration options, it is perfect for abrasive materials and is delivered after just 7 days of production.

What makes the S.KI SOLID the perfect solution for express delivery?

The tipper semi-trailer is robust, flexible and durable. With an extremely short delivery time of just seven days of production and a wide range of customisable configurations, the S.KI SOLID with express delivery offers rapid availability and maximum flexibility.

Robust rounded steel body for maximum efficiency

The rounded steel tipper body of the S.KI SOLID offers a loading volume of 24 m<sup>3</sup> and a side wall height of 1,460 mm. The floor plate is made from 5 mm highly wear-resistant steel, while the side walls are 4 mm thick. The rear wall is available as an internal pendulum tailgate with a chute or as an external pendulum tailgate with a peripheral seal.

Stable and durable

The universally deployable rounded steel tipper made of wear-resistant fine-grained steel requires little maintenance. Its intelligent design ensures maximum stability and durability. The flat, wider floor lowers the centre of gravity and improves driving stability. The chassis with Schmitz Cargobull axle is suitable for off-road use.

The quick solution for short-term needs without compromise

Respond quickly and flexibly to new requirements and configure a standardised new vehicle to your specifications. This means that you no longer have to resort to stock, used vehicles or expensive rental vehicles when you have a peak in orders, which in most cases represents a compromise.

More payload,  
robust, simply  
unshakeable.

Quality is our top priority for all components used in the S.KI SOLID tipper trailer. Our goal is robustness and payload with maximum durability.

The surface-mounted **pendulum tailgate** with all-round seal is suitable for partial unloading and is optionally available with a sliding plate. The rear wall as an internal pendulum tailgate with a chute or a combination door extends the range.

The **working platform** is used to operate the roller cover and is equipped with an anti-slip floor, a trough-shaped entry aid and a parking position for the hydraulic hose.

The roll-up **cover** is a simple and cost-effective way to protect the skip from moisture and dust, and it also reduces air resistance. The electric sliding roof, which can be opened and closed quickly by remote control, can also be configured.

information on the  
equipment

Secure standing with frequent changes of tractor: supporting winch or steel drop supports as full-load supports.

Higher payload and a great look with optional aluminium wheels.

The **Schmitz Cargobull axle unit** consists of high-quality components that are perfectly matched to each other. With MRH (Multi-Ride-Height) air suspension: Ideal for lowering the centre of gravity when unloading – lighter and even more robust.

Unshakeable  
transport solutions –  
customised and well  
thought out.

As a strong partner for your success, we  
provide you with transport solutions and  
services that you can rely on, for greater cost-  
effectiveness, efficiency and transparency in  
your fleet and along the supply chain.

Ex works in every  
S.KI SOLID with express delivery

With **TrailerConnect® telematics**, you receive real-time data for more transparency and efficiency in your fleet and the supply chain. In the **TrailerConnect® portal**, you can manage all of your fleet's telematics data on one platform – across all manufacturers.

The **TrailerConnect® tyre pressure monitoring system** with auto-location assigns the integrated sensor to the correct tyre position.

The sensor learns independently and records tyre pressure and tyre temperature data.

This means efficient fleet management, intelligent disposition, higher trailer availability and effective processes.

### Service contracts

Increase your uptime, create cost transparency and reduce your workload with **service contracts** for trailers and tyres.

You can rely on:

## The Schmitz Cargobull Premium services and the competent partner network.

- Customised financing and insurance from industry professionals
- Second Hand – First Class Used in tested quality
- TrailerConnect® telematic and digital services for smart logistics
- Spare parts that pay off, for repairs in line with the current value
- Full service for trailer, cooling unit and tyres
- Order Genuine Spare Parts online, delivery within 24h
- 1,400 Service Partners - your specialist workshop network
- 24h Cargobull Euroservice assistance across Europe
